Mrs. Johnson is not taking her medicine regularly. What will Dr. Cooper think? What will she say? ...

LET'S WATCH.....

Are you taking your medicine Mrs. Johnson?

Well... the truth is that I am not taking my medicine like I am supposed to.

Why aren't you taking your medicine like you are supposed to?

For many reasons ... but the biggest one is that I am concerned about side effects.

What kind of side effects are you having?

The main one is, going to the bathroom a lot. It is very uncomfortable and annoying!

Mrs. Johnson, having to go to the bathroom a lot is very normal when you first start taking a “water pill” (diuretic) like you are taking. This is just the way your body releases the fluids until it can adjust to the medicine.

Okay, that makes me feel better because I was very concerned that something was wrong.

I think your problem with going to the bathroom a lot will be better once your body adjusts to the medicine. I will give you a brochure that explains side effects.

Thank you Dr. Cooper,

Is there anything else causing you not to take your medicine?

Well... I drink a little wine and sometimes I worry whether I can drink wine while I am taking this medicine.

Drinking is causing Mrs. Johnson not to take her medicine. How will it play out?

STAY TUNED...
